Tanium Announces Consist As First Accredited Partner in Central Europe

Munich - Kiel - Tanium, the leading provider of endpoint management and security in the most demanding IT environments in the world, has intensified its cooperation with Consist after the company was brought on board as the first German managed security service partner in August 2020.

Based on its holistic range of services and solutions for IT security, digital transformation and managed services, Consist supports IT security in all areas of the company. With the successful certification, Consist has now officially become the first accredited Tanium Partner in the Central Europe Region. The managed security service provider is now able not only to implement the Tanium platform for its customers, but also to offer them full service during ongoing operation.

"With the official accreditation as a Tanium partner, we can further deepen our cooperation with Consist," says **Harry Küssner, Head of Channel & Alliances, EMEA Central at Tanium**. "The decisive factor here is the great advantage that arises for Tanium customers, since Consist can independently offer services such as installation, maintenance or troubleshooting which compliment the Tanium platform. Consist is therefore in a position not only to sell the Tanium service, but also to actively support it."

"We are pleased to be able to continue our successful partnership and thus provide our Tanium customers with a holistic service package from now on," explains **Martin Lochte-Holtgreven, CEO at Consist Software Solutions GmbH**. "This year has again shown us how business-critical it is to continuously manage technology risks and close security gaps

immediately. The basis for this is maximum transparency of the network environment and reliable endpoint management."

The demand for these requirements being delivered by Tanium and Consist is increasing, driven in part by various digital transformation and hybrid working initiatives. Gaining visibility of what devices are connecting to the organisations' networks has become an integral part of maintaining smooth business operations. By having access to high-fidelity endpoint data in real-time, organisations can take quick action to remediate vulnerable endpoints. This capability supports a well balanced IT strategy that contains preventative security measures as well as reactive ones.

Further information is available at info@consist.de.

About Tanium:

Tanium is the platform that the most demanding and complex organizations trust to gain visibility and control across all endpoints in on-premises, cloud, and hybrid environments. Tanium addresses today's increasing IT challenges with high-fidelity endpoint data — giving IT operations, security, and risk teams confidence to quickly manage, secure, and protect their networks at scale. Nearly half of the Fortune 100, top retailers and financial institutions, and multiple branches of the U.S. Armed Forces trust Tanium to help see and control every endpoint, everywhere. That's the power of certainty. Tanium has been named to the Forbes Cloud 100 list of "Top 100 Private Companies in Cloud Computing" for six consecutive years and ranks on FORTUNE's list of the "Best Large Workplaces in Technology 2021." Press Release

About Consist:

Consist Software Solutions GmbH is a specialist in IT security, digital transformation and managed services. The company's comprehensive range of services and solutions enables IT security for all areas of a company. The introduction of endpoint management, employee training and the establishment of a SIEM, SOAR or SOC are components of an interlocking security strategy. Consist uses market-leading solutions such as Tanium, Splunk and Proofpoint for this. More than 200 employees not only take care of the conception and integration of the necessary IT architectures, but also the subsequent support of applications and systems in the managed services. Consist has more than 35 years of experience in the market and is present in Kiel and Frankfurt. More information at consist.de.
